

# Customized Simple Table of States

This report is a variation of the Simple Table of States report that uses a **custom skin** for the following customizations:

- The table is displayed using the dataTables plugin by adding the JavaScript **datatables\_features.js** in the custom skin. which adds various widgets to operate on the data contained in the table, such as (above the table) the search box and the number of entries to be shown, and (below the table) the pagination and the number of rows. Type a few letters in the search box to get the idea. See the dataTables documentation for more information on this JQuery plugin.
- The presentation of the dataTables controls are themed by adding the stylesheet **datatables\_styling.css** in the custom skin.
- Some of Forena's default styling is refined (e.g. the size of the edit icons), by adding the stylesheet **forena\_styling.css** in the custom skin.
